To Whom It May Concern:

This is a letter of recommendation for Signs & Wonders, Inc. I have been fortunate to have worked with Debbie and Josh at the recently completed NASA – Exploration Science Building. I served as the Quality Control Manager during this project. I have seen Signs & Wonders in action fabricating and installing interior signs and they oversaw the installation of the one exterior sign.

Signs & Wonders fabricated many and installed all of the interior signage. Debbie was instrumental in providing advice and recommendations for constructability and some budget issues. Josh demonstrated an ability to receive direction and act independently with a high level of quality. Their willingness to being flexible in delivery and installation schedule served Manhattan and the project well, especially at the end of a project.

I am pleased to give a recommendation for any building interior sign project.

Sincerely,

MANHATTAN CONSTRUCTION COMPANY
